ABOUT ME

I'm a product designer who works through the full process, from research and wireframes to prototyping and handoff. For me, good design is when something feels under control: you know where you are, what you can do, and what happens next. I'm especially interested in the logic behind interactions, beyond just how things look.

EXPERIENCE

Product Designer

Ogilvy Barcelona | March 2021 – Present

- Define the **UX approach** for projects: analyse requirements, conduct benchmarking and identify improvement opportunities.
- Collaborate with **UX researchers** to conduct usability tests and interviews, and define metrics to evaluate design solutions.
- Use **research insights and data** to design user flows, wireframes, interactions and high-fidelity prototypes.
- Build and maintain **design systems** (components, tokens, variables) and apply **accessibility** (WCAG) across my designs.
- Work closely with **developers and PMs** on solutions, documentation and handoff, and present design decisions to clients and stakeholders.
- Use **AI tools** to organise feedback, document decisions, explore solutions and streamline research and design workflows.

Selected clients: Audi, Nestlé, Sanpellegrino, Nescafé Dolce Gusto, Purina and Volkswagen.

EDUCATION

Design System Pro

Shift+R · Raúl Marin | Nov 2025 – Oct 2026
